Wikipedia list article A podcatcher, or podcast client, is a computer program that is used to download various media via an RSS or XML feed. [1] [2] [3] While podcatchers are best known for downloading podcasts (generally audio files in MP3 format or similar), many are also able to download video, news updates, text and images. Some of these podcatchers can also automate the transfer of received audio files to a portable media player. Although many contain a folder of high-profile podcasts, they generally allow users to manually subscribe directly to a feed by providing the URL. The core concepts had evolved since 2000, the first commercial podcast client software was developed in 2001.[4] and podcasting became popular in 2004. [5] When Apple added podcatching to its iTunes software in June 2005, it almost immediately became the most popular client. [6] Podcatchers Following is a list of notable podcatchers or software with podcatching capability. Downloaded from If you love listening to Podcasts, Windows 10 has a handful, but some impressive apps that can get you a good experience. You will be able to subscribe, download them offline, and with software like iTunes, going across the device is even better! Free Podcast Apps for Windows 10 A podcast is an audio file made available on the Internet made to listen. It could be a chat or a discussion that a user can download to his or her device and listen. If you're looking for apps that help you listen to Podcasts, check out this list. 1] Grover Pro This is the best app for Podcasts on Windows 10. It's clean and simple, and make sure you enjoy your podcast without putting a lot of head in the UI. Here's the list of features: Stream audio podcasts directly from the Search app and subscribe to podcasts using the search box. Option to automatically remove podcasts already listened Option to display system message when there are new podcasts available Option to automatically download new podcasts Omarrange podcasts catalog (Drag/Drop) Themes Light and Dark. If you're using iTunes on Windows 10, it can also use the iTunes database. It also has integration with OneDrive. The app costs \$2.99, and it's available here. 2] AudioCloud If most of your podcasts are hosted on SoundCloud, the AudioCloud app is what you need. It supports features such as playback, playback speed control, sleep timer, drag-and-drop playlist control, Cortana voice commands, and Live-tile integration. That said, there are two limitations due to Sound Cloud API limits. Not all tracks are available for listening due to third-party app restrictions. The app respects no-caching and no-downloading policy as per the SoundCloud API Terms of Use. Download it from the Microsoft Store. 3] VLC for Windows 10 This is a media player that is full of surprises. You can use it not only for video, and audio, but also for Podcasts, which are built into the Player. Open VLC Media Player > Click the View menu > Select Playlist > Internet > Podcasts Here you can click the + button and you can subscribe to a podcast by copy-pasting its URL into the window. This is good enough to stream podcasts online, but may not fit as the only podcast app for you. One of the primary reasons is that it does not find new episodes to search, and secondly there is no way to cache episodes for offline listening. 4] Audible from Amazon Audible is from the Amazon company. Although it is known listen ebooks, it provides a function called as Channels. The you tons of podcasts that you can follow, subscribe to, and listen to even in offline mode. That said, you need Amazon Prime subscription to use it. Download audiobooks for Audible here. 5] iTunes for Windows If you're holding an Apple device, love listening to podcasts on the go and want to have the same here. iTunes makes sense to you. Available for Windows. You can download individual podcast episodes, download to new episodes, and it can be automatically downloaded for you when they become available. When you're in the iTunes Store, click the Podcasts menu item, and then either browse the categories or search. Once you've found your podcast, you can listen or subscribe or get a specific episode. Download iTunes from apple.com. Windows 10 has a limited number of Podcast app, and so the choices are pretty limited. But apps like Grover Pro make a big difference.
